

What you can expect from me in the case of relational rupture:

I will...

- Make opportunities for communication and repair
- Own my mistakes openly
- Share my feelings and experience with you
- Not blame you even if transference or projection is happening
- Meet you in humility
- If we feel the need for external mediation this can be arranged and the cost of which is shared 50/50 between us

Reporting an incident

I aim to create a culture of care that respects and supports clear communication and consent. This means listening to and taking seriously all incidents that arise in the training space, including online, that cause harm.

If you want to report an incident or grievance you can do that [here](#).

(All information shared is kept strictly confidential)
